

Tri-Service CADD/GIS Technology Center

*Facilities Management
Software/Solutions*

7 April 1999

by

Denise Bullock

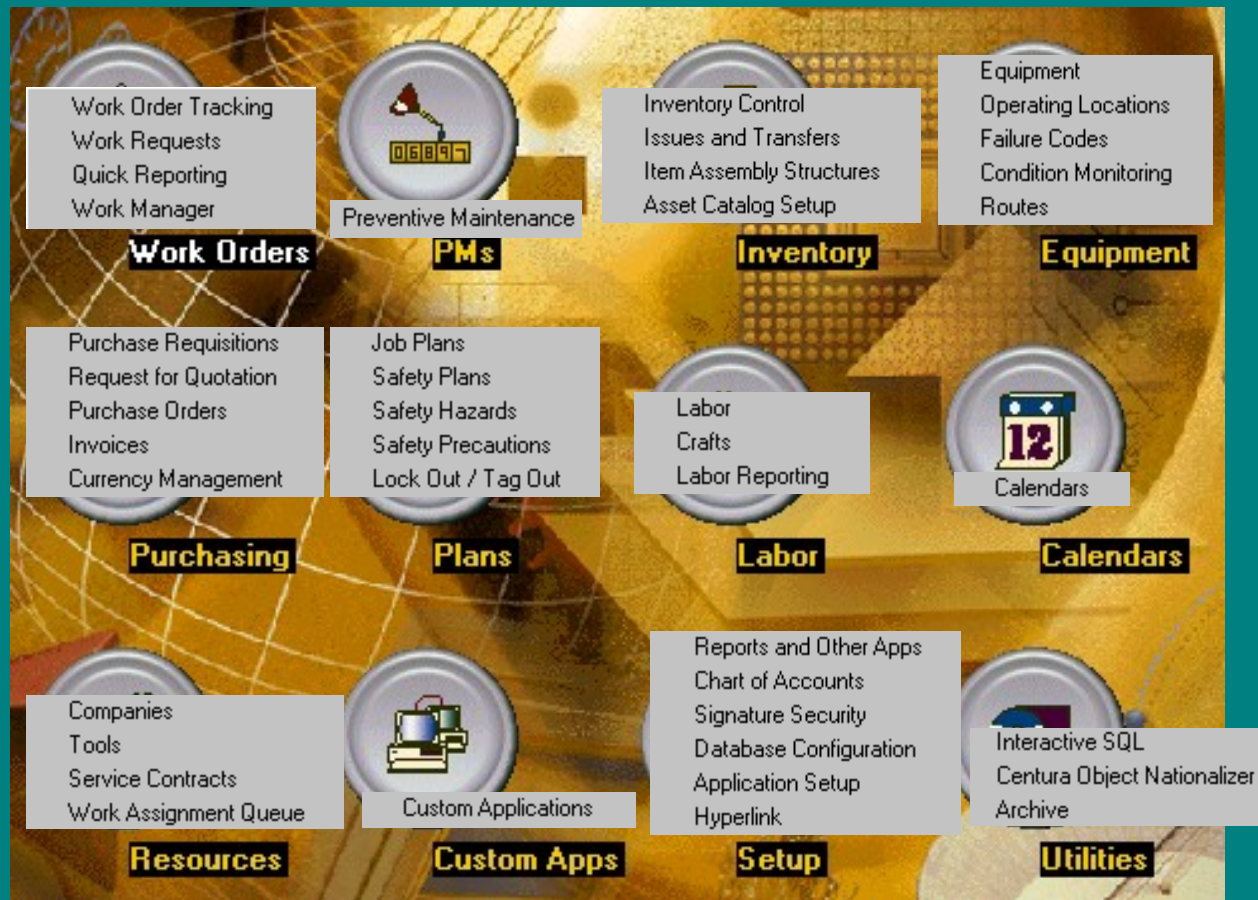

MAXIMO

- *Computerized Maintenance Management System (CMMS)*
- *Concentrates on Asset modeling*
- *Reconfigurable*
- *Client/server architecture*
- *Scalable*
- *Windows-based*

MAXIMO

- *Assets can be viewed by functional need*
- *Drilldown capabilities can track assets, even when they are moved*
- *Hot links to electronic documents relate data to a specific asset - floor plans, repair histories, manuals, contracts,...*

MAXIMO Enterprise 4.0

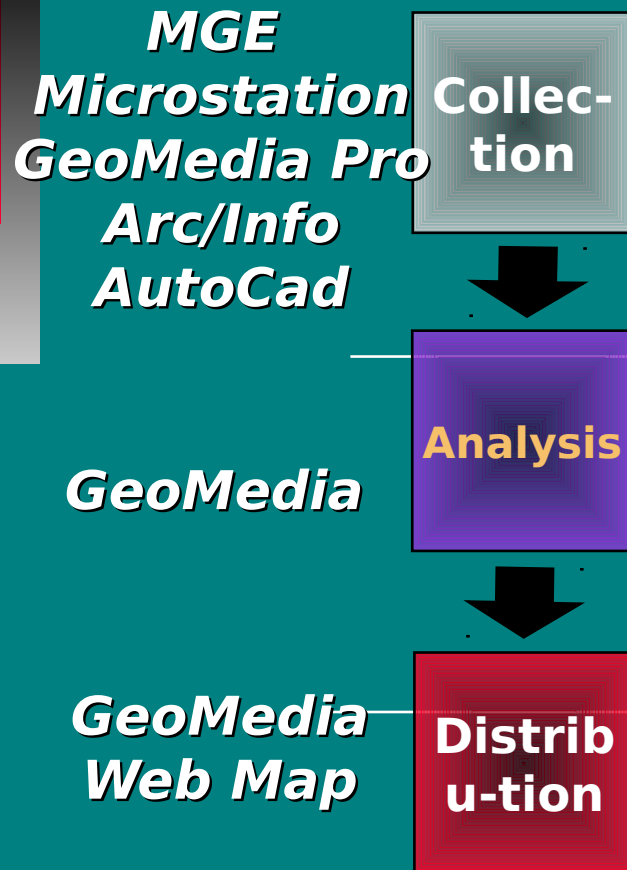

Intergraph Federal Systems

- A leading provider of software and integration services
 - GIS Solutions
 - Facilities Maintenance Management Systems
 - Maximo
 - Computer Aided Dispatch
 - Document Management
 - UNIX/NT interoperability products
 - Network Products and Services

Product Map

GeoMedia

- *Spatial analysis*
- *Thematic mapping*
- *Reads multiple GIS data formats*
- *Integrates multiple projects/map projections*
- *“Stand-alone”*
 - *uses Windows graphics and file utilities*
- *Fully Windows/OLE-compliant*
- *Easily customized*

GeoMedia Pro

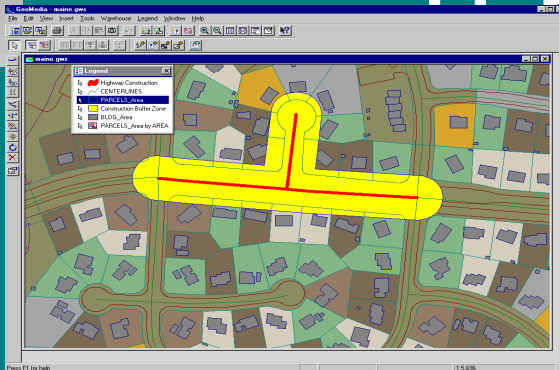

- *Data Capture & Maintenance*
- *Data Editing and Validation*
- *Analysis and Output*
 - *uses Windows graphics and file utilities*
- *Fully Windows/OLE-compliant*
- *Easily Customized*
- *Uses Standard RDBMS*

GeoMedia Web Map

- *Provides GIS data over the WWW*
- *Dynamically accesses GIS/CAD data*
- *Click on map graphics to retrieve other data*
 - *attributes, reports, photos, CAD drawings*
 - *hyperlinks to other WWW sites*
- *Data provider controls data accessibility*
- *Feature display controlled by map scale*
- *Combine vector & raster maps in display*

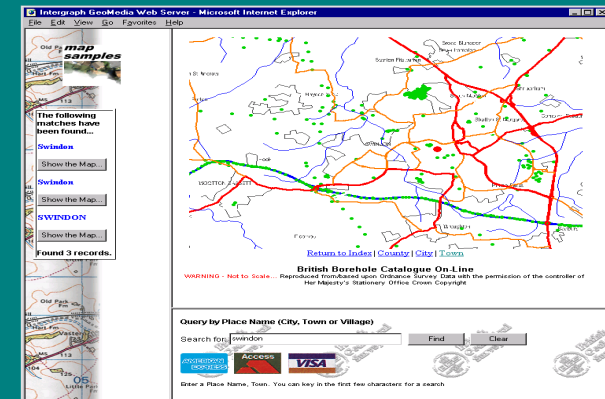

CAD/GIS Software Capture Maintain

Enterprise Database

View over the W

Benefits

- *Transitions the Installation to a COTS based solution, such as, PWMA to Maximo*
- *Provides visibility into day to day activities and costs*
 - *Work Orders*
 - *Scheduled and Emergency Maintenance*
 - *Budgeted vs Actual Expenditures; incl. Roll-ups*
- *Provides Cost Estimating and What If analysis*
- *Provides Financial Management*
 - *Links to other corporate financial systems*

Integrating the Desktop

- *A solutions-oriented approach for addressing installation data management problems and issues*
- *A collection of tools and techniques that support mission-critical operations and maintenance for an installation*
- *Open, economical standards-based integration strategy between sources of data and systems*
- *“Any Base” web-based storefront for corporate information dissemination*

Implementation

- *Design for the distributed Enterprise*
- *Follow a consistent, proven methodology for design and implementation*
- *Strive for Data Interoperability vs. Data Conversion*
- *Deploys appropriate tools for a variety of users*

Typical Software Components

- *GeoMedia to view and merge disparate GIS, CAD and relational data.*
- *MAXIMO - enterprise asset maintenance supporting multi-site facility management and integration with ERP and financial systems.*
- *AnyBase Web tools for easy access to live data and an entry point for work requests.*

 used to display GIS Maps
 and CAD drawings

FIS Objective

- ***Focuses on large-scale enterprise-level implementations***
- ***Provide the most feature-rich, scaleable technology and core product engines***
- ***Deliver best-of-class technology***
- ***Partner with other best-of-class technology developers***

FIS/FM Major Tasks

- ***Operational***
 - ***Asset Management
(people,space)***
 - ***CADD Integration***
 - ***Property Management***

- ***Tactical***
 - ***Work Orders
(move/scheduling, real
property, ...)***

- ***Strategic***
 - ***Planning***

FIS/FM

- ***Built on native Oracle***
- ***Windows-based***
- ***leverages AutoCAD & MicroStation***

FIS/FM

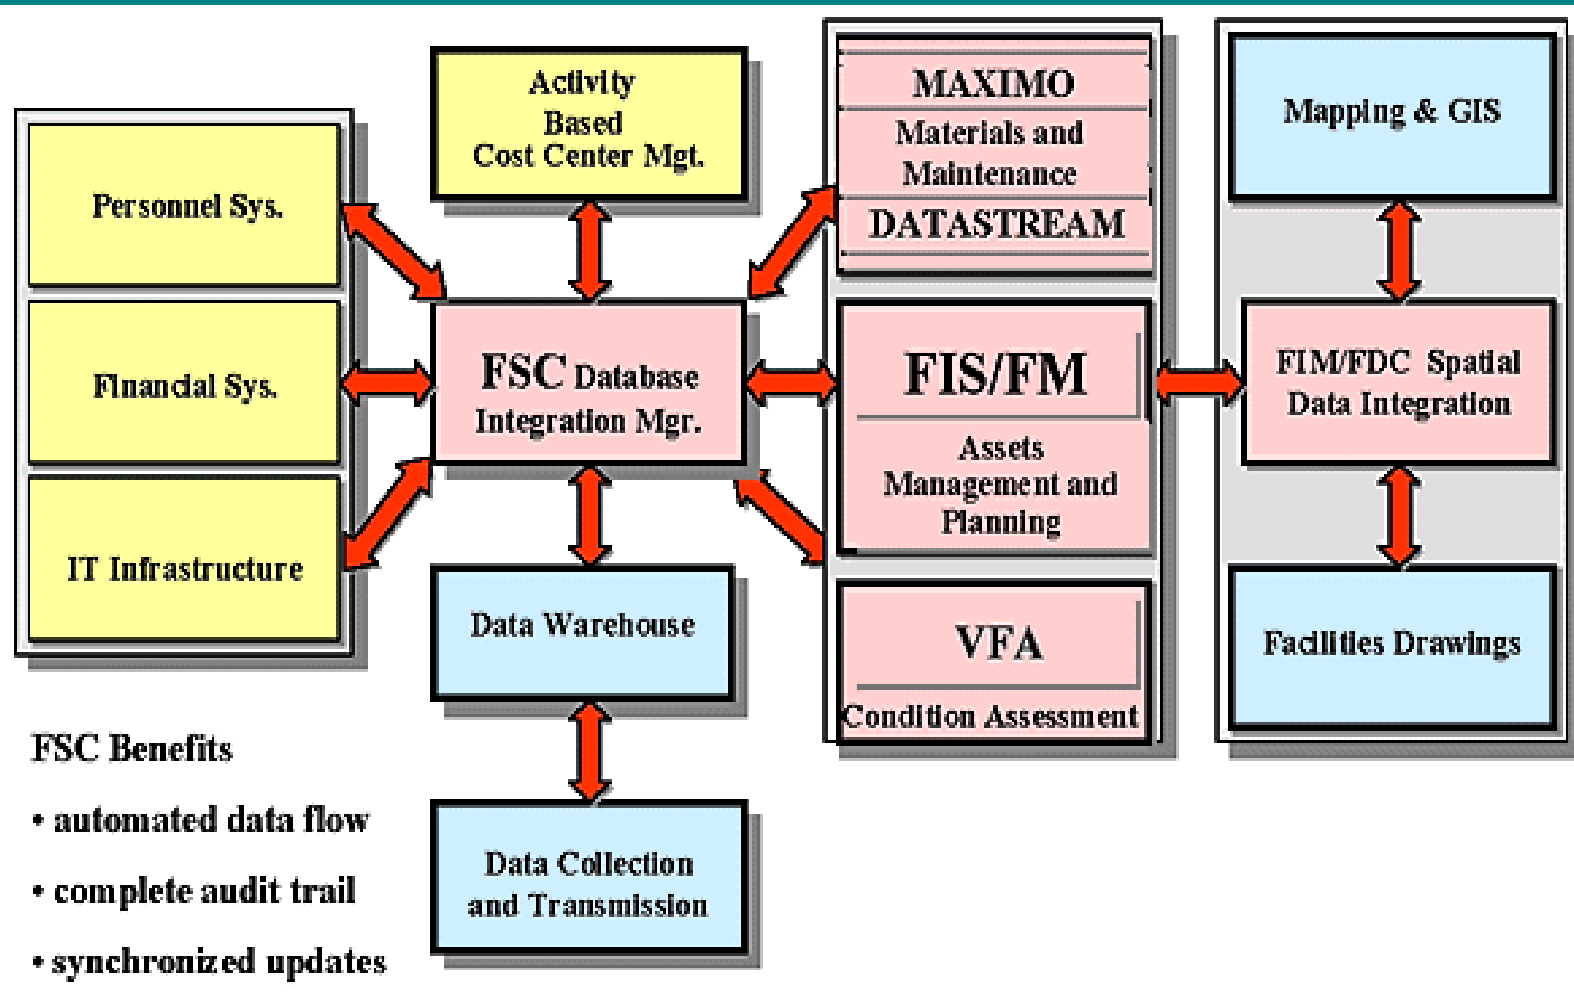

FIS “best-of-class” Implementation Concept

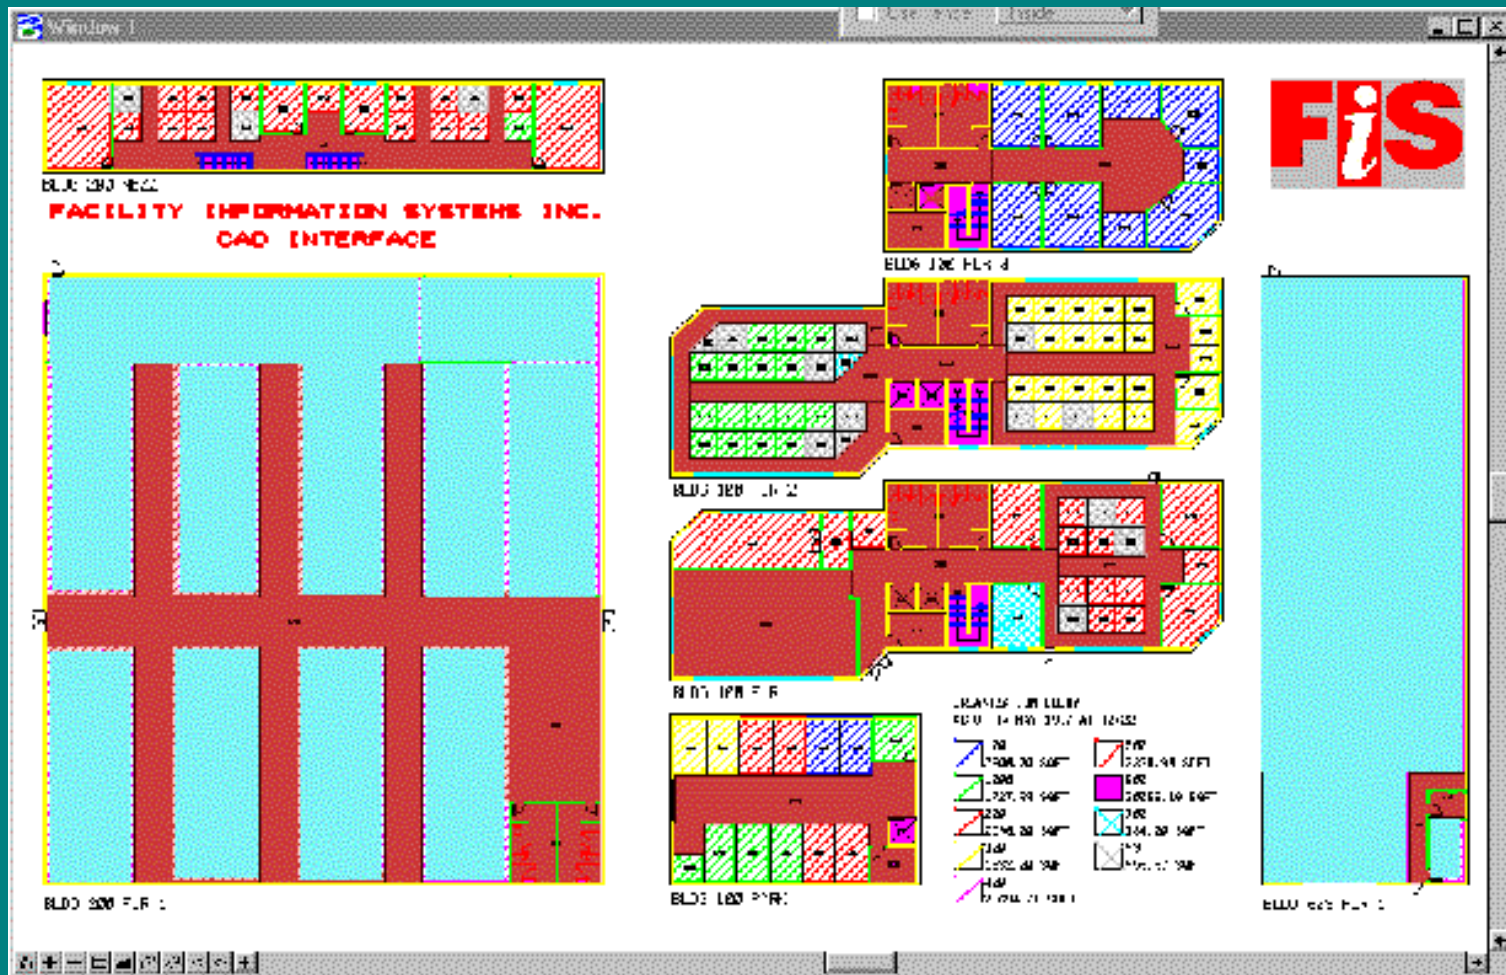

FIS/FM is specifically designed for data rich and data sharing environments where information is routinely passed between multiple databases, including:

- ***financial***
- ***maintenance***
- ***cable management***
- ***human resources***

FIS “best-of-class” Implementation Concept

Facility Drawing Coordinates

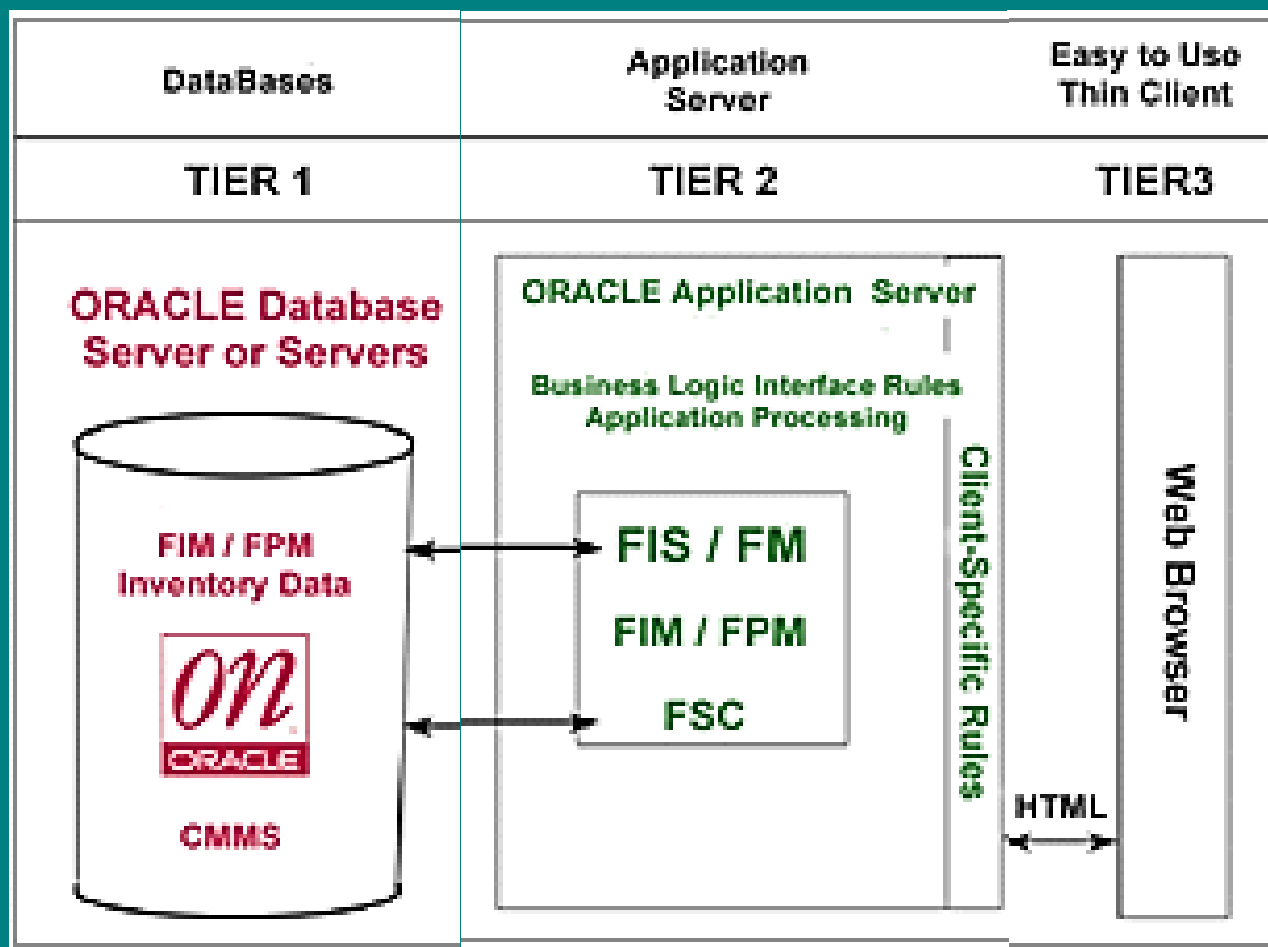

Principal FIS Software Modules

- ***Facility Inventory Manager***
- ***Facility System Coordinator***
- ***Facility Drawing Coordinator***
- ***Facility Requirements Programmer***
- ***Facility Stack & Block***
- ***Facility Master Planner***
- ***Facility Move Manager***
- ***Facility Property Manager***
- ***Facility Information Display***

Web-based Technology

MapGuide Interface

ArcFM

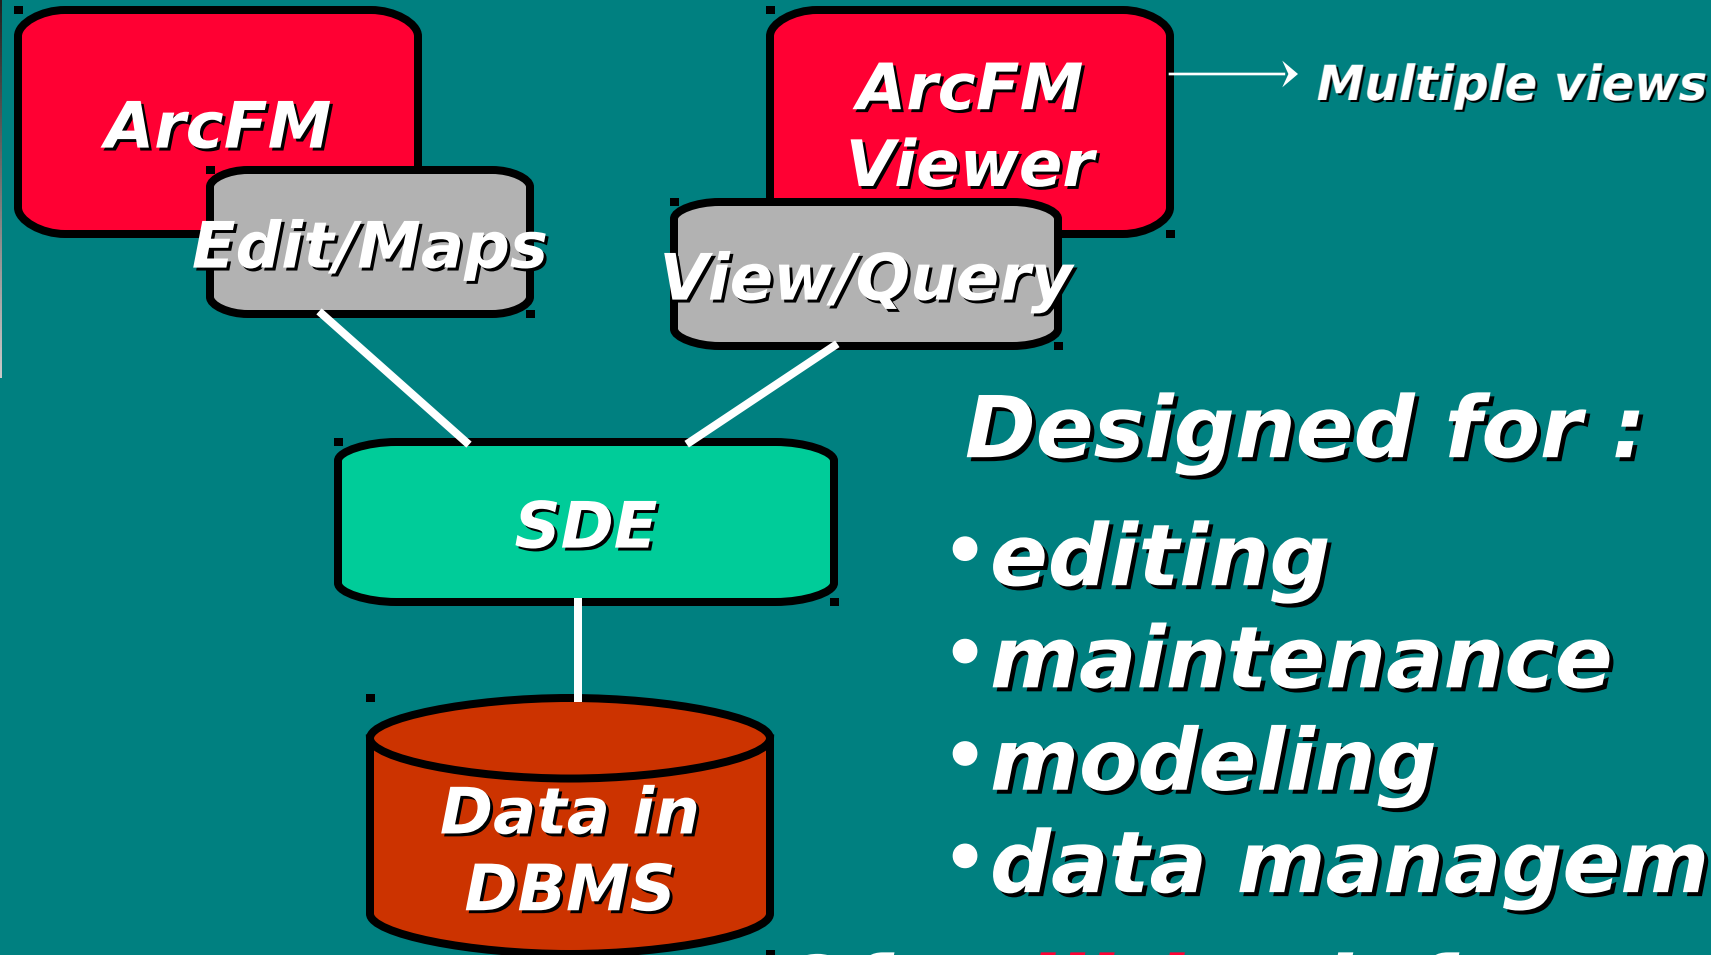

- *Developed by ESRI & Miner and Miner*
- *ARC/INFO-based application*
- *Complete solution for utilities*
- *Windows NT-based*
- *Visual Basic programming env.*
- *All-relational - SDE*
- *RuleBase Engine encodes*

Supports the data management needs

- ***electric***
- ***gas***
- ***water***
- ***wastewater***
- ***land base***

ArcFM Major Tasks

Designed for :

- **editing**
- **maintenance**
- **modeling**
- **data management**

Of Utilities information

ArcFM RuleBase

- *used to encode business rules into database design*
- *provides a single, common, customizable methodology for data model, data control, and interface*
- *covers symbology, data editing, data management, data connectivity, and validation rules*
- *encapsulates all required domain-specific knowledge for each application area*

ArcFM

Helps utilities efficiently answer questions such as:

- ***Where are my facilities and how are they being used?***
- ***What is the condition of water mains, valves, hydrants, meters, storage facilities, sewer mains, and manholes?***
- ***How many valves are due for inspection in the town of Vicksburg,***

Foundation Information for Real Property Management - FIRM

- ***FIRM is an automated real property asset management system.***
- ***FIRM provides information to Federal real property officers throughout the life cycle of real property***
 - ***acquisition***
 - ***use***
 - ***disposal***

FIRM Modules

- ***Inventory***
- ***Lease Contract***
- ***Income/Expenses***
- ***Work space Planning***
- ***Rent***
- ***Interfaces***
- ***Reports***
- ***System Administration***

FIRM

Produces data needed externally by:

- ***Governmentwide Real Property Inventory System (GSA Form 1166)***
- ***Workspace Management Plan and Budget Justification (GSA Form 3530)***
- ***Annual Survey program***

FIRM

- ***Operates on a LAN providing client/server processing***
- ***Uses a major, modern relational database***
